

## My Profile

I am a passionate software engineering student, working in field actively and have strong foundation in web development and enterprise systems. I have hands-on experience with PHP, Laravel, MySQL and SAP ABAP. I've built dynamic websites and scalable SAP applications. I thrive in collaborative environments, love solving real-life problems through code, and constantly seek opportunities to learn new tech. I've enjoyed every second of my journey and would love to add a lot of other names in my career uphill.

## Education

### BS-Software Engineering

[Virtual University]  
Semester: 6th

#### COURSE WORK

#### [Cs50 Introduction to programming with JS

[Harvard University]

#### SAP ABAP

[University of Lahore]

Career oriented technical program with advanced workbench hands-on-training such as smartforms and ALV reports.

## Experience / Projects

### BiafoTech Ltd. Software Developer

[Sep 2020 - Present]

- Designed & Developed New Custom Features
- Translated business requirements into technical specifications
- Built OData Services and automated reporting process

**Tech Stack:** SAP ABAP | Fiori | oData service | Workflows | .NET APIs

### Addo ai. Software Developer

[Feb 2020 - Sep 2020]

- Engineered full-stack site
- Implemented CRUD & sessions
- Customized WordPress theme
- Built e-commerce modules
- Deployed auth & admin panels

**Tech Stack:** PHP | WordPress CMS | MySQL | JavaScript (jQuery) | RESTful APIs | GitHub

### Climate Data Analysis Using R

 Developed linear regression models in R to predict global temperature

**Tech Stack:** R, RStudio, corplot

**Skills Demonstrated:** Statistical modeling, data visualization

### Expense Tracker

 Created web application to track daily expenses and categorize them

**Tech Stack:** PHP, JavaScript, MySQL

**Skills Demonstrated:** Data validation, session handling, dynamic UI updates

### To-Do List Application

 Build a simple to-do list app to add, edit, and delete tasks, and mark them as completed.

**Tech Stack:** JavaScript, HTML, CSS

**Skills Demonstrated:** DOM manipulation, event handling

## Achievements

### Microsoft virtual internship

June 2020 – August 2020

Work ready skills such as time management, discipline and self-motivation. A new insight to experience the real-time internships responsibilities.

### Google IT Automation with Python (Coursera)

#### Grow with Google scholarship Award

Getting virtual machine experience to automate routine task with Python, GitHub and operating system management

### Forage virtual internship

#### Real-time scenario problem solving using Python

Using advanced concepts to solve real-time problems and came with optimal solution to effectively preserve space and time. Working on shared code to achieve collaboration, proficiency and standard techniques.

## Skills

Team Collaboration	Project management
Decision Making	Strong Problem Solving
Analytical Thinking	Project Ownership

## Technical Skills

Frontend	HTML5   CSS3   Bootstrap   JavaScript   JQuery
Backend	PHP   Python   C#
Framework and Architecture	WordPress CMS   Laravel (MVC)   REST API Design
Database and Services	MySQL   CRUD operations   oData Services
ERP and SAP	SAP ABAP   SAP Fiori   RAP Model   Smartforms   ALV Reports
Tools and Version Control	Git   GitHub   Composer
Data Analytics	R (basic)   PowerBI (dashboard creation)
